Trainer's Performance Report

Dear Team at **Farida Shoes**,

We are pleased to present the performance summary of the five **IT Professionals** who successfully completed the **3-month Full-Stack Development & Project Implementation Program** conducted by **Aryu Academy**. This comprehensive training was delivered through multiple expert trainers, ensuring end-to-end mastery across both frontend and backend technologies.

1. COURSE PERFORMANCE

Throughout this program, IT Professionals were trained in the following technologies:

Frontend Development (Latest Standards)

HTML5 / CSS3 – Modern Web Foundations

Trainer: Mr. Abdul Rahuman

- Covered semantic HTML5, responsive design principles, Flexbox, Grid, CSS3 animations, and modern styling practices.

JavaScript & React.js

Trainer: Mr. Venu

- Delivered in-depth sessions on ES6+, component architecture, state management, hooks, API integration, and reusable UI patterns.

React.js Final UI Sessions

Trainer: Mr. Kottai Muthukumar

- Covered advanced component structuring, frontend routing, optimization techniques, form handling, and real-world UI design.

Backend Development (Python & Django & PostgreSQL)

Trainer: Mr. Arun Kumar

Covered:

- Python programming fundamentals to advanced concepts
- Django MVC architecture
- ORM queries, serializers, views, forms, and middleware
- REST API development and authentication
- Django project structuring and modular development
- PostgreSQL database usage, schema design, relationships, query optimization, indexing, and real-world DB integration
- Backend deployment considerations

Individual Course Performance Summary

1. Mr. Taqi Mohammed

Mr. Taqi excelled in **both frontend and backend** learning. He showed impressive understanding of React.js concepts and demonstrated strong capability in Python, Django, and PostgreSQL fundamentals.

2. Mr. Yousuf Raza

Mr. Yousuf performed exceptionally well in **backend development**, mastering Python logic, Django ORM, API development, and PostgreSQL database integration with clarity and confidence.

3. Mr. Zaid Mohammed

Mr. Zaid showed excellent progress in **frontend development**, especially in React.js UI building, component design, and API consumption. He also gained good backend understanding during Python sessions.

4. Mr. Irfan Mohammed

Mr. Irfan performed positively in **frontend areas**, understanding React.js flows, state management, and component interactions. He maintained a good grasp of backend basics as well.

5. Mr. Thalha Mohammed

Mr. Thalha demonstrated steady improvement, performing well in **React.js frontend tasks** and completing backend learning modules successfully.

He was disciplined and consistent throughout the course.

All IT Professionals received complete training in **Python Full-Stack Development**, covering both frontend and backend concepts.

2. PROJECT PERFORMANCE

Initially, the IT Professionals planned to build the final capstone as a complete **full-stack project**, where each individual would work on both frontend and backend.

However, based on our professional recommendation, the team decided to **split the project responsibilities** into:

- **Frontend Team (React.js)**
- **Backend Team (Python + Django + PostgreSQL)**

This decision was made to ensure:

- ✓ Higher efficiency
- ✓ Better code quality
- ✓ Faster completion
- ✓ Clear responsibility separation
- ✓ Project delivery within the timeframe

The team accepted this approach and executed the project with strong coordination.

Backend Project Performance (Python + Django + PostgreSQL)

- **Mr. Taqi Mohammed** and **Mr. Yousuf Raza** contributed strongly to backend tasks.
- They handled Django models, PostgreSQL schema design, API logic, authentication flows, and data processing very effectively.
- Their backend work was accurate, clean, and well-structured.

Frontend Project Performance (React.js)

- **Mr. Zaid Mohammed**, **Mr. Irfan Mohammed**, and **Mr. Thalha Mohammed** were responsible for the React.js frontend.
- They worked on UI layouts, interactive components, API consumption, and design refinements.
- Their collaborative effort resulted in a functional and polished frontend interface.

3. OVERALL SUMMARY

Across the 3-month training and project phase, all five IT Professionals demonstrated:

- ✓ Strong learning attitude
- ✓ Professional behavior and teamwork
- ✓ Steady improvement in both frontend and backend
- ✓ Positive adaptation to modern full-stack workflows
- ✓ Commitment to delivering a real-world project

While **Mr. Taqi Mohammed** and **Mr. Yousuf Raza** excelled in backend areas (Python, Django, PostgreSQL),

Mr. Zaid Mohammed, **Mr. Irfan Mohammed**, and **Mr. Thalha Mohammed** delivered a good performance in the React.js frontend.

Thank you for trusting **Aryu Academy** for this training program.

It was a pleasure guiding your team, and we are available for further support or upcoming training needs.

Warm regards,

**Aruna Yuvaraj,
Aryu Academy.**
